Name: Michael McGinnis

Email Address: [REDACTED]

Comment: It is appalling that Republic Services is prioritizing profit margins over the health and well-being of citizens directly affected by their gross negligence at the West Lake Landfill. As US Citizens, we rely on the EPA to protect human health and the environment. All of the scientific studies from the area prove that a total removal of ALL radioactive waste is the only way to fully protect these citizens. I urge you to use all possible resources to ensure the safety of the site and it's citizens. Your priorities should be with the citizens you protect and not the billion dollar companies that are responsible for this contamination! I also urge you to compensate the families that have had to bury loved ones and watch their sons, daughters, dads, mothers, etc. suffer and die due to radioactive contamination. Please think of how you would respond if it was your own family living in these communities, dieing in these communities, because a billion dollar company prioritizes profits over the lives and safety of innocent American citizens. Sincerely, Michael
